WORK EXPERIENCE

jr. React.js developer @ kalathiya infotech, Surat

July 2024 - Present (11 months) | Full-time

- As a Junior React.js Developer, I contributed to the development of multiple full-stack web applications in a collaborative team environment. I was actively involved in both frontend and backend development depending on the project needs, primarily focusing on React.js while also contributing to Node.js, MongoDB, and PHP-based backends
- Developed web applications including projects like Pifron (e-commerce), Bus Booking System, Jewellery Platform, and others.
- Led the frontend development using React.js, Redux, and modern UI libraries like Bootstrap and Tailwind CSS for responsive design.
- Integrated RESTful APIs using Axios and Fetch for dynamic data handling.
- Created and connected MongoDB schemas for dynamic data models and implemented data validation on both client and server sides.

Skills Developed: HTML, CSS, Javascript, Bootstrap, React.js, Redux, MongoDB, Tailwind, PHP, NodeJs

TAGLINE

Will power is the hammer that break all barrier.

SKILL

HTML | CSS |Bootstrap |Tailwind|Javascript |Reactjs|PHP|NodeJs |Redux|C/C++

EDUCATION

Saurashtra University, Saurashtra University Campus, Munjka, Rajkot, Gujarat

B.C.A., Computer Applications | 7.4 CGPA

2022 - 2025

Arihant Academy

secondary education (class X) | 64 percentage

2019 - 2020

Arihant Academy

Higher education (class XII) | 72 percentage

2021 - 2022

EXTRACURRICULAR

Took part in a painting competition organized by Reliance Foundation, showcasing creativity and interest in visual arts.

Competed in a city-level painting event conducted by My FM, gaining experience in extracurricular involvement.

OBJECTIVE

I am dedicated to getting an opportunity where I can maximize my potential and significantly contribute to the organization's growth.

PROJECT

Bus Booking Web Application

Skills Developed: HTML, CSS, Javascript, Bootstrap

- This project is a fully responsive and interactive bus ticket booking system developed using core web technologies. The application allows users to seamlessly book tickets to various destinations with a clean and user-friendly interface
- Designed the frontend UI based on a Figma prototype using HTML, CSS, and JavaScript.
- Implemented dynamic functionality with JavaScript to manage destination selection, ticket booking, and form validation.
- Ensured the site is responsive and accessible across multiple devices and screen sizes.

Cafe and Restaurant Management System

Skills Developed: HTML, Javascript, Bootstrap, CSS

- A web-based restaurant management system built to streamline the operations of cafes and restaurants. The platform supports both customer and admin views with distinct functionalities.
- Developed Admin Panel for restaurant owners/managers to manage categories, subcategories, products, orders, invoices, and customer data.
- Created User Panel for customers to log in using their phone number and place customized orders via a digital menu.
- Integrated dynamic form components for selecting product variations, extra toppings, and generating real-time bills.

Project Management Tool

Skills Developed: HTML, CSS, Bootstrap, Tailwind, React.js, Redux, Socket.io, API

- A Trello-inspired task management platform designed for enterprise-level team collaboration. This application enables users to manage tasks, set deadlines, assign priorities, and monitor project status in real-time.
- Designed the frontend using Figma, implemented with React.js, Tailwind CSS, and Bootstrap.
- Developed user-side functionalities including task boards, lists, cards, and real-time updates using Socket.io and Node.js.
- Integrated RESTful APIs for task CRUD operations and implemented live collaboration features via WebSockets.

E-Commerce Vegetable Store – Seller Panel

Skills Developed: HTML, CSS, Bootstrap, React.js, Javascript, Redux, API

- A dedicated seller-side interface for an e-commerce platform that facilitates product listing and order management for vegetable vendors.
- Developed the seller panel for vendors to add, update, and manage their products.
- Integrated APIs to manage orders and display seller-specific data dynamically.
- Implemented secure routing and data handling based on individual seller credentials.

Jewellery Store – Online Shopping Platform

Skills Developed: HTML, CSS, Javascript, React.js, Bootstrap

- A feature-rich e-commerce platform focused on selling jewellery products, providing a seamless user experience with modern shopping features.
- Developed the user panel with advanced features like cart, wishlist, order tracking, and filters.
- Integrated various social sharing options and user interactions.
- Handled API integrations for data management and dynamic rendering.
- Backend built using Laravel, ensuring secure and scalable server-side processing.

Pifron – E-Commerce Platform with Admin Dashboard

Skills Developed: HTML, CSS, Javascript, Bootstrap, React.js, NodeJs, MongoDB

- Pifron is a full-stack e-commerce application developed using the MERN stack (MongoDB, Express.js, React.js, Node.js). It supports product listings, sales operations, and includes an admin dashboard for managing products, users, and orders
- Designed and implemented the frontend in React.js using Bootstrap for responsive layout
- Managed complete backend development using Node.js and MongoDB, including RESTful API integration.
- Created a robust admin panel to handle product inventory, order processing, and user management.

Eletromania – Electronics E-Commerce Platform

Skills Developed: HTML, CSS, Bootstrap, React.js, Javascript, Redux, Third-party API , Node.js ,mongoDB

- Developed ElectroMania, a full-stack e-commerce platform for selling electronic project kits using React.js (frontend) and Node.js/Express.js (backend).
- Created dynamic product listings, user authentication, and cart management with seamless frontend-backend integration.
- Used MongoDB for managing user data, product inventory, and order records in a scalable NoSQL database structure.
- Integrated Shiprocket API in the backend to automate shipping processes like pickup requests, order tracking, and delivery updates.
- Ensured secure and efficient user experience with JWT-based authentication, responsive UI, and structured RESTful APIs.
